THE HAKABO STORY

~ MARKETING ~

Hakabo Marketing started from a love of creativity and an interest in helping small businesses show up online in a way that feels right for them.

I have over five years' experience working in marketing, PR and social media management, with a background in Fine Art. Alongside this, I run my own creative small business, Hakabo Studio, so I understand how overwhelming marketing can feel when you're trying to do everything yourself.

I work with businesses across a range of industries, offering all-round marketing support. This includes social media management, content creation, website updates and management, newsletters, and design support, basically helping you keep everything consistent and working together.

I take the time to understand your business, your audience and what you're trying to achieve, so your marketing feels clear, considered and genuinely you, not generic or corporate.

Whether you're just getting started or want more confidence and structure in your marketing, I'm here to help.
